

Anaconda Download

1. Google search 'Anaconda download'
2. URL could look like 'anaconda.com/download' or similar
 - * It should be free
 - * The latest version of Anaconda contains python 3.10
3. If you need Anaconda with previous versions:
 - <https://docs.anaconda.com/free/anaconda/reference/packages/oldpkglists/> search for the version you need
 - <https://repo.anaconda.com/archive/> find the same version here and click the link for download (x64)
 - I have installed Anaconda *2021.05* with python 3.8
 - Useful links:
<https://anaconda.cloud/getting-started>
<https://docs.anaconda.com/free/anaconda/install/windows/>
4. Run executable file
5. Steps:
 - Next
 - I Agree
 - Just Me
 - Default destination
 - Check the box about PATH environment variable if you're installing anaconda for the first time
 - * Check if it contains python version you want - if you want it to be the same as the one on your machine
 - * If you have one python version on the system already installed, that is different from anaconda's, uncheck PATH Click Install
 - Uncheck 'Tutorial' and 'Learn More' Finish
6. Check if it works: run Anaconda Navigator app (~it takes some time to open) Launch VS Code or Jupyter for example, to see if everything works fine.
7. You're done
